Our Story

Founded in 1981, Hunter Industries is a family-owned, global manufacturer of best-in-class solutions for residential, commercial, municipal, agricultural, and golf course irrigation systems, as well as the outdoor lighting industry. Headed by CEO Greg Hunter, our Global Operations Team provides leadership for the entire company. The core mission of Hunter Industries will always remain the same: to deliver valued products and services backed by unwavering customer support, grow the company conscientiously, and remain true to the culture that makes our employees proud to work at Hunter. Learn more at hunterindustries.com.

Product Highlights

When it comes to ensuring green and playable golf courses, irrigation simply must become more efficient. Achieving this goal requires more than high-performing golf irrigation products that push the boundaries of innovation. You need a trusted partner, from conception to installation and beyond.

Pilot Command Center Software

With cloud database backups, web-based features, and POGO visual insight integrations, Pilot Cloud lays the foundation for the future of golf course irrigation control. Offering optimised display and functionality and more informed scheduling adjustments using real-time data, this intuitive solution creates more possibilities for third-party integrations and mobile optimisation.

TTS-800 Series Golf Rotors

Maximise performance in the field with our top-of-the-line golf rotors. Featuring exclusive PressurePort™ Nozzle Technology for maximum distribution uniformity, no-dig Total-Top-Serviceability for easy maintenance, and the largest flange compartment in the industry, these rotors ensure peak playability and years of reliable operation.

PILOT™ CONTROL NETWORK

Pilot CCS

Pilot IHS

TTS Rotors

DEMAND THE BEST. CHOOSE HUNTER GOLF.

Pilot CCS

Command Center Software

With next-generation Pilot Command Center Software, you can create hydraulically safe and efficient daily course watering plans faster than ever before. Pilot helps manage thousands of individually controlled sprinklers in seconds. It's the ideal management tool for an Integrated Hub System.

Pilot IHS

Integrated Hub System

Integrated Hub Systems help you save time and money from day one. Compared to a Field Controller System, an Integrated Hub System uses less copper wire and requires fewer splices, valve boxes, and concrete pads. This means lower costs, faster installation, and easier system diagnosis and repair, if needed. You can also easily expand the system if desired.

TTS Rotors

With Two-Way Modules

Two-way module (TWM) technology built into every TTS rotor permits highly efficient control of complex irrigation systems. The rotors are connected to the system via low-voltage, direct-burial communication cable.

ICD-HP PROGRAMMER

Communicate Directly with TWMs

Program and troubleshoot Pilot Two-Way Modules with no digging or wires required. The handy device communicates directly through the plastic without barcodes, saving you time in the field.

PILOT™ COMMAND CENTER SOFTWARE

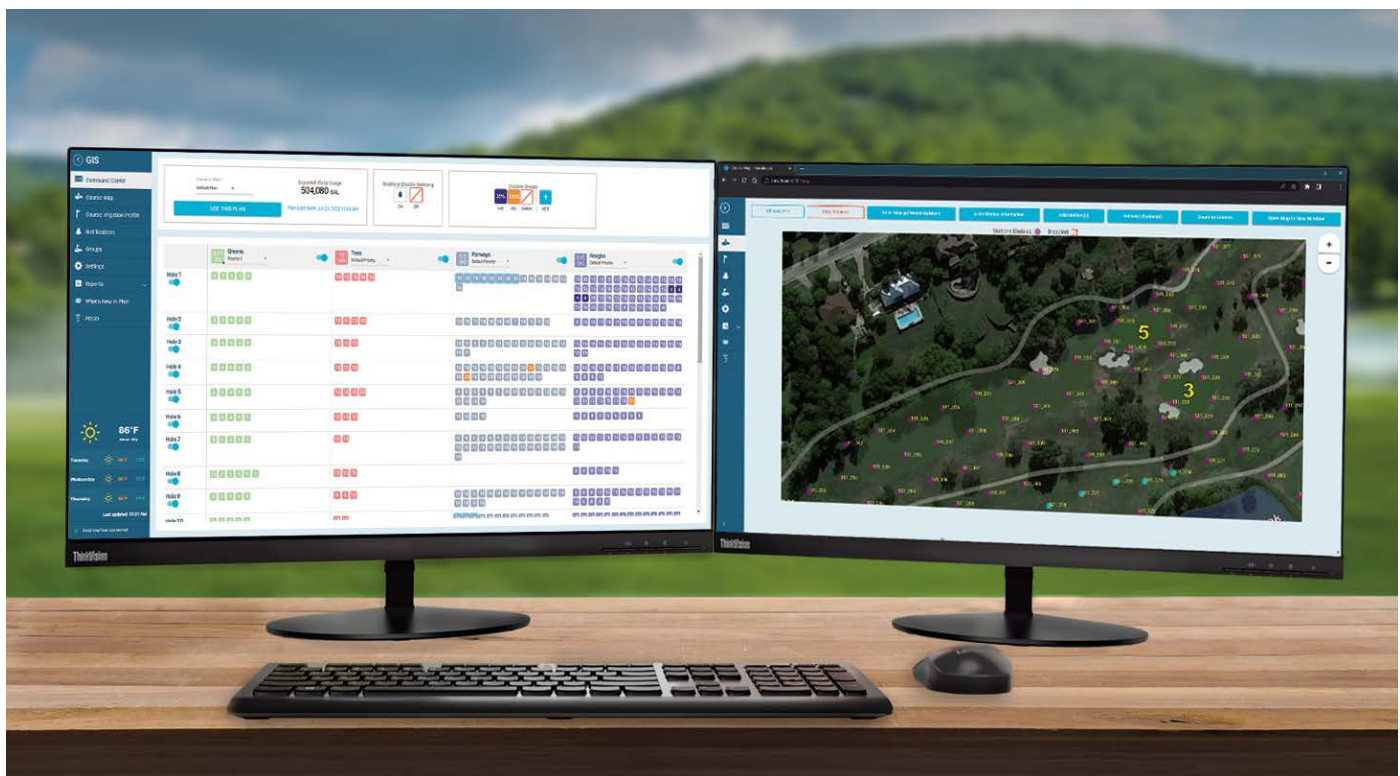

Enjoy simple yet powerful irrigation management and control with revolutionary Pilot CCS.

Pilot Command Center Software (CCS) is easy to use and has all the features you need to reliably and automatically water your course. Run times can be adjusted manually or determined automatically using evapotranspiration (ET). You create watering plans directly in the Command Center — a powerful irrigation planning tool that shows you every sprinkler on the course, organised according to your management style.

PILOT SPECIFICATIONS

- Operating system: 64-bit Windows®
- Maximum controllers or hubs: about 1,000
- Maximum Two-Way Module stations: about 1 million
- Sprinkler run time options: minutes, millimetres, inches, or ET
- Hydraulic management: fully customisable down to individual stations
- Mapping: interactive and based on scalable vector graphics (SVG)

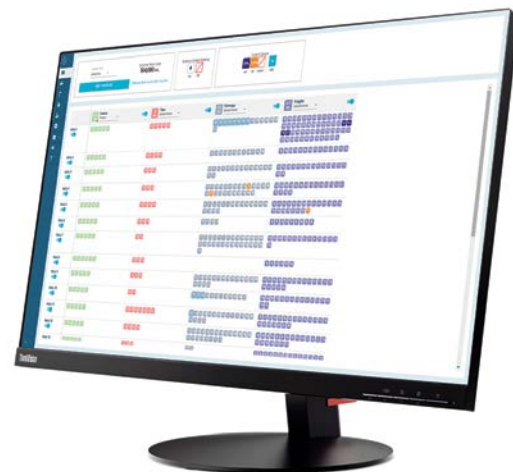

Pilot Command Center Software

Windows is a trademark of Microsoft Corporation in the United States and/or other countries.
Lenovo® and ThinkVision® are trademarks of Lenovo in the United States, other countries, or both.

SET SCHEDULES WITH THE COMMAND CENTER

Planning daily watering for your course has never been simpler. The Command Center shows every sprinkler on the course, logically arranged according to your personal management requirements. You can easily make daily adjustments with just a few clicks of the mouse.

Command Center

SPEND LESS TIME RUNNING YOUR PUMP

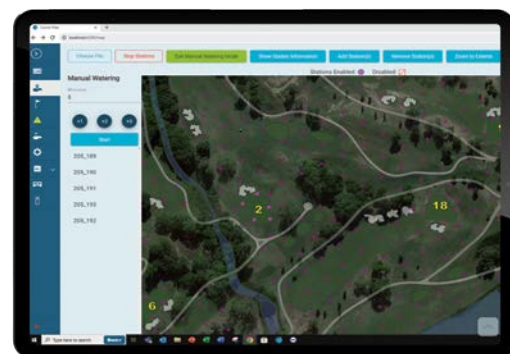

Pilot CCS uses your electrical and hydraulic data to efficiently balance sprinkler demand while maintaining flow at safe velocities. To protect your pump station and maintain optimal sprinkler uniformity, you can gradually step up irrigation in safe increments.

Flow Optimisation

ACCESS INSIGHTS FROM ANYWHERE WITH PILOT CLOUD

Bring powerful irrigation control and monitoring to your fingertips with Pilot Cloud. Web-based features enable optimised display and functionality from any location on any device, while third-party integrations save time and resources with more informed scheduling adjustments using real-time data. Plus, cloud-based backups ensure peace of mind if the computer ever needs to be restored.

Maps

PILOT™ FIELD CONTROLLER SYSTEMS

The sleek, clean design of Pilot Field Controllers makes them easy to install, use, and maintain.

KEY BENEFITS

- Five languages
- Up to 80 station outputs in 10-station increments
- Up to three Hunter golf Valve-in-Head Technology rotors per station output
- Up to 20 simultaneous Hunter golf Valve-in-Head Technology rotors active per controller
- 32 automatic schedules with eight start times per schedule
- Exclusive Safe-Toggle™ Technology for mechanical on-off-auto station switches
- 1 to 31 day skip-day scheduling
- One-touch rain shutdown up to 30 days or indefinitely
- One-touch Safe-Pause™ Technology with 30-minute safety timer
- 1% to 300% run time seasonal adjustment
- Seasonal start time adjustment is used to quickly change all start times plus or minus 30 minutes
- PilotFCP Utility enables remote scheduling from a computer or tablet for basic course irrigation management

Pilot-FC Plastic Pedestal

Height: 100 cm
Width: 60 cm
Depth: 44 cm
Weight: 32 kg

POWER SUPPLY INPUT

Two voltage settings:

- 120 VAC nominal voltage at 60/50 Hz (100 to 132 VAC)
- 230 VAC nominal voltage at 50/60 Hz (200 to 260 VAC)

Current requirement:

- 1 A under load at 110 VAC
- 0.7 A under load at 230 VAC

For additional information, see electrical data on **page 65**.

Pilot-FI Field Interface

One is required with any Pilot Network system. It is used to link the central computer to the field equipment. For indoor locations only.

Height: 30 cm
Width: 30 cm
Depth: 11 cm
Weight: 2 kg

OUTPUT VOLTAGE

- Station: 1 A at 24 VAC
- Hot post: 0.4 A at 24 VAC
- Capacity: Three standard 24 VAC Hunter golf rotors per output; 20 maximum simultaneously running stations

RADIO SYSTEMS

- UHF radio: 450 to 490 MHz; other UHF frequencies available for selected markets

WIRED SYSTEMS

- GCBL: Two twisted pairs of shielded wire, 0.82 mm²
- GCBLA: Armoured, shielded two twisted pairs, 0.82 mm²

PILOT-FI – SPECIFICATION BUILDER: ORDER 1 + 2 + 3

1 Model	2 Standard Features	3 Communication Options
Pilot-FI	Plastic pedestal (grey)	HWR Hardwire communications UHFA UHF radio (licence required)

Examples:

Pilot-FI-HWR = Field Interface with hardwire communications

Pilot-FI-UHFA = Field Interface with UHFA radio communications

THE PILOT FIELD CONTROLLER IS ENGINEERED EXCLUSIVELY FOR GOLF COURSE IRRIGATION MANAGEMENT

PILOT-FC - SPECIFICATION BUILDER: ORDER 1 + 2 + 3

1 Model	2 Standard Features	3 Communication Options
Pilot-FC20 (20-station)	Plastic pedestal (grey) 120/230 VAC, 60/50 Hz dual-voltage transformer	S Standalone Field Controller with no central communications
Pilot-FC30 (30-station)		HWR Wired communications
Pilot-FC40 (40-station)		UHFA UHF radio (licence required, Australia only)
Pilot-FC50 (50-station)		
Pilot-FC60 (60-station)		
Pilot-FC70 (70-station)		
Pilot-FC80 (80-station)		

Examples:
Pilot-FC40-S = 40-station, standalone Field Controller with no central communications
Pilot-FC70-HWR = 70-station Field Controller with wired communications

PILOT™ INTEGRATED HUB SYSTEMS

Save money without sacrificing in-field sprinkler control with highly flexible and reliable Pilot Integrated Hub Systems.

Integrated Hub Systems use significantly less wire than conventional systems. This means lower costs, faster installation, and easier system diagnosis and repair if needed. They can be easily expanded — with minimal digging and disruption of turf — by adding more Pilot Two-Way Modules (TWMs) instead of running additional wires.

Pilot Two-Way Modules are available with 1-, 2-, 4-, and 6-station outputs, making it possible to run each head on an entire green with a single device. In all, TWMs let you operate about 1,000 stations up to approximately 2.5 km from a single hub.

Pilot Two-Way Modules include built-in surge suppression, wirelessly programmable station addresses using the ICD-HP Programmer, and two-way communication with confirmation and status indication. Pilot Surge Suppressors are required when the system is installed with integrated TWMs.

The PilotFCP Utility enables remote scheduling from a computer or tablet for basic course irrigation management. It can be directly connected to a Pilot Field Controller, eliminating the need for a Pilot Field Interface and communication module in smaller systems.

TWM Hub

Water-Resistant Keypad

The backlit display and illuminated control panel mean you can easily access the hub, day or night

Diagnostic LED Indicators

For all functions on 250-station output modules

250-Station Output Modules

Enable your Integrated Hub System to expand with your course; start with 250 and grow to 999

Pilot TWMs

1- and 2-station:
Height: 9 cm
Width: 4 cm
Depth: 2.5 cm
Weight: 150 g

4- and 6-station:
Height: 9 cm
Width: 4.5 cm
Depth: 4 cm
Weight: 250 g

The distinct yellow design makes it much easier to find the modules in dark valve boxes or buried in the soil.

Pilot Surge Suppressor

All integrated TWM rotors include two DBRY-6 Splice Connectors for connection to the two-wire path. Integrated TWM systems require grounding with Pilot Surge Suppressors coupled to an appropriate grounding plate or rod. Hunter recommends a minimum of one Pilot Surge Suppressor for every 12 installed rotors or as per project specification.

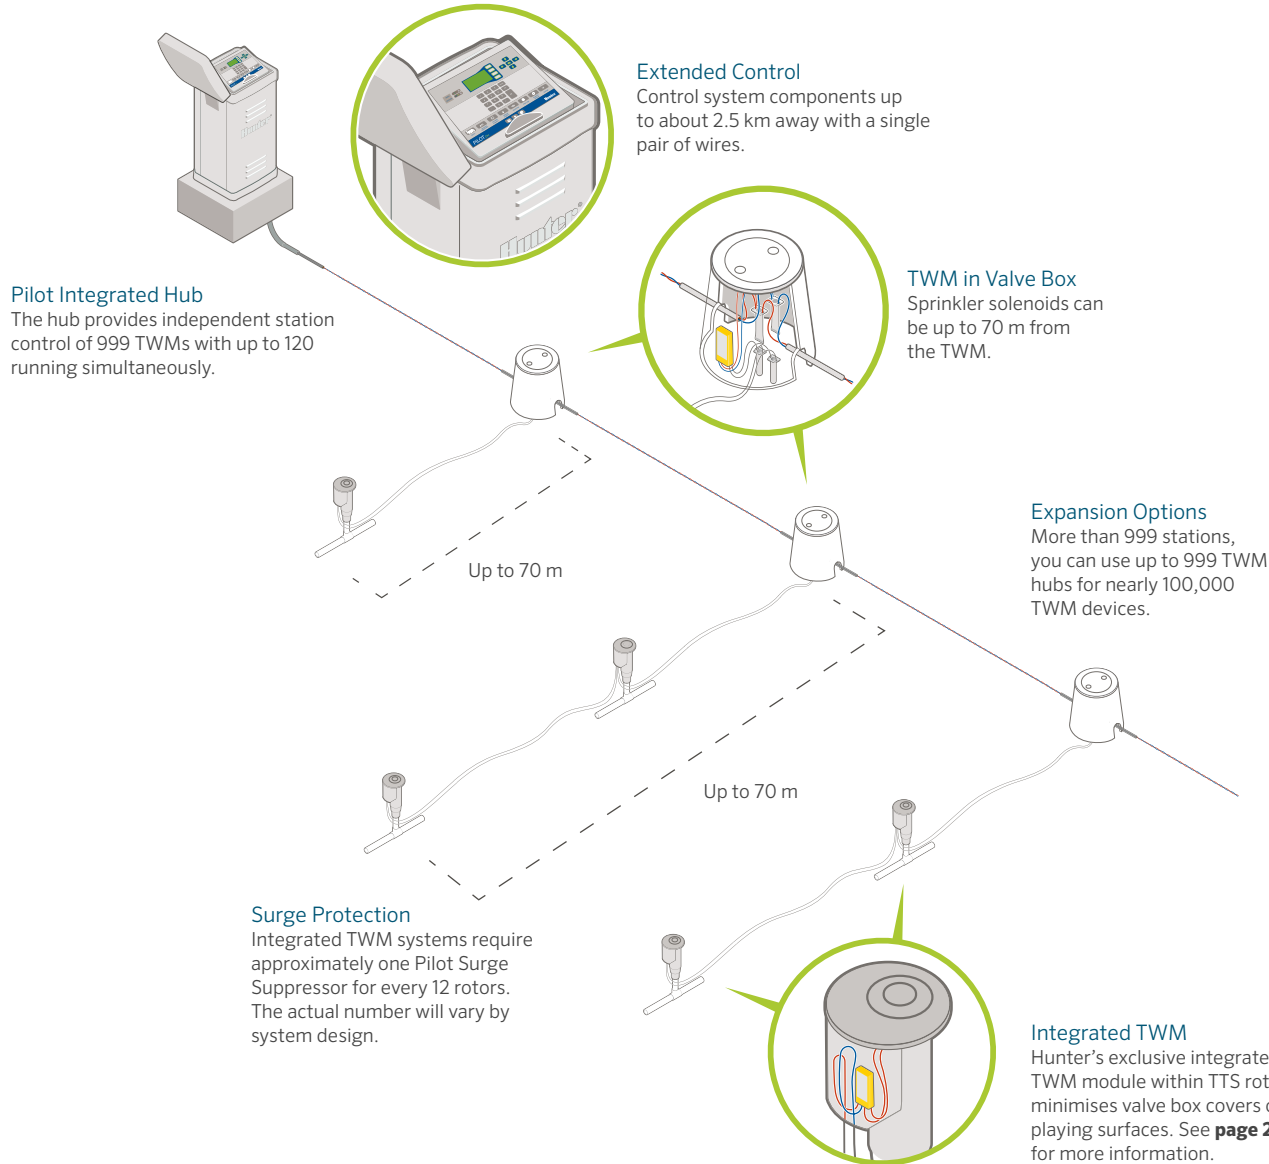

PILOT-DH – SPECIFICATION BUILDER: ORDER 1 + 2 + 3

1 Model	2 Standard Features	3 Communication Options
Pilot-DH250 (250-station)		S Standalone TWM hub with no central communications
Pilot-DH500 (500-station)	Plastic pedestal (grey)	HWR Wired communications
Pilot-DH750 (750-station)	120/230 VAC, 60/50 Hz switching transformer	
Pilot-DH999 (999-station)		UHFA UHF radio (licence required)

Examples:

Pilot-DH250-S = 250-station, standalone TWM hub with no central communications

Pilot-DH999-HWR = 999-station TWM hub with wired communications

TWM - SPECIFICATION BUILDER: ORDER 1 + 2		
1	Model	2 Standard Features
Pilot-100	1-station TWM	Built-in surge suppressor
Pilot-200	2-station TWM	Waterproof DBRY-6 Splice Connectors included
Pilot-400	4-station TWM	
Pilot-600	6-station TWM	
Pilot-SG	Inline surge suppression (for integrated TWM rotor systems)	

Example:
Pilot-100 = 1-station TWM

Wireless Programming

The ICD-HP Programmer is used to test, troubleshoot, and program integrated TWMs. It allows you to wirelessly link directly to TWMs without removing the TTS cover. You can also use it to update the coding inside the TWM's microprocessor.

See the ICD-HP Programmer on **page 13**.

POGO™ HARDWARE

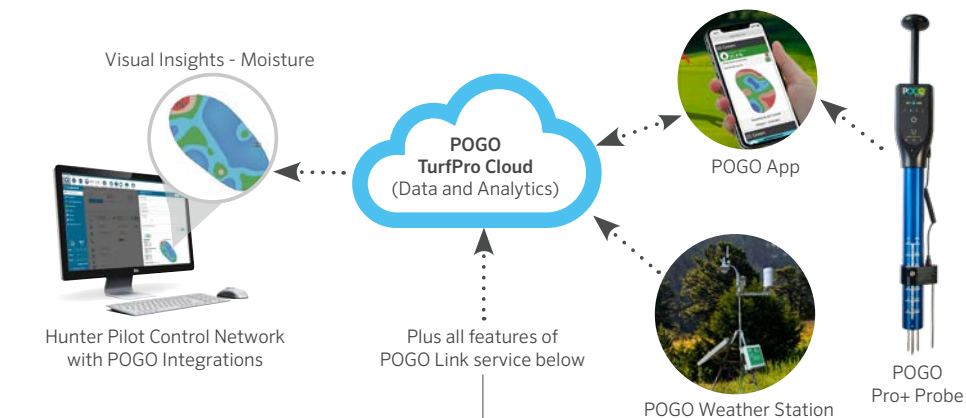

Integrate the unmatched hardware and data analysis from POGO with the power and intuition of the Pilot Control Network to save time, maximise resources, and ensure peak playability.

MANAGE YOUR WAY

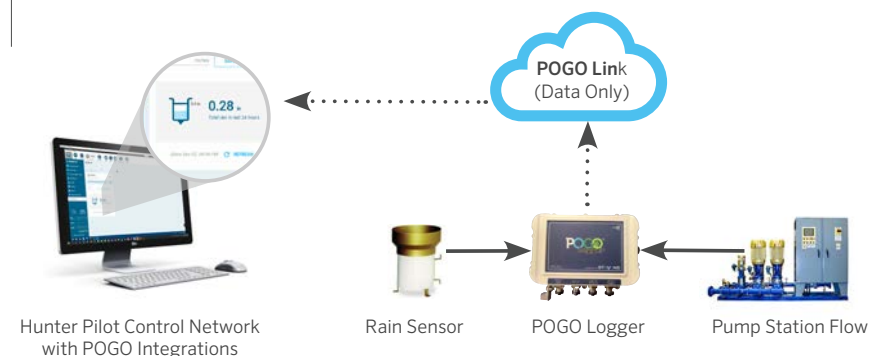

Subscribe to the all-inclusive **POGO TurfPro Cloud** or the sensor-based **POGO Link** service to gain better visibility of your golf course irrigation efficiency.

- Achieve optimum irrigation efficiency with more informed scheduling adjustments using real-time soil moisture, salinity, and temperature data
- Better understand turfgrass performance between irrigation cycles
- Identify and address problem areas with colour-coded graphics that highlight turf in need of immediate attention — often before symptoms appear

- 1 POGO TurfPro Cloud – Data and Analytics with Advanced Visual Insights**
 Proactively drive improved, consistent playability by knowing the exact conditions of your turf.

- 2 POGO Link Service – Data Only**
 Make more informed irrigation adjustments by monitoring key environmental data in real time.

POGO HARDWARE

Catalogue Number	Part Description
POGO-PRO-PLUS	POGO Pro+ Tool with Temperature Sensor. Active TurfPro Cloud subscription* required.
POGO-PRO-PLUS-KIT	POGO Pro+ Tool with Temperature Sensor, Case, Cart Mount, and Replacement Sensor. Active TurfPro Cloud subscription* required.
POGO-LOGGER-I	POGO Data Logger with cellular communication for use with other sensors. Active data plan subscription* required.
POGO-RAIN-CAN	POGO Rain Can - 15 cm Tipping Precipitation Gauge for use with POGO Logger
POGO-SOIL-SENSOR	POGO Soil Sensor - Buried Hydraprobe Root Zone Sensor for use with POGO Logger
POGO-WEATHER-I	POGO Weather Station with cellular communication. Mounting sold separately. Active TurfPro Cloud subscription* required.
POGO-TRI-POD	POGO Tripod Mount for Weather Station

*Go to pogoturfpro.com to set up a subscription.

MAINTENANCE RADIO

Save time and money with seamlessly integrated remote radio control.

KEY BENEFITS

- Hunter's innovative StraightTalk™ Technology enables wireless remote control at ranges up to 3.5 km whether or not the central computer is turned on
- Instant control of stations, blocks, and programs
- Instant audio confirmation of commands
- Easy commands that show in display before sending
- Compact size, industrial construction
- Suitable for two-way voice communication with crews and office
- High signal output: 2 W, UHF (450 to 490 MHz)*

* Licence required

TRNR Radio

Height: 10.25 cm
Width: 5.25 cm
Depth: 3 cm
Weight: 200 g

ICD-HP PROGRAMMER

Gain wireless, handheld programming and diagnostic capabilities for Pilot Two-Way Modules.

KEY BENEFITS

- Wirelessly program TWM addresses
- Program TWM station numbers in any order or skip stations for future expansion
- Turn stations on and view solenoid status, current in milliamps, and more
- Built-in voltmeter for testing communication path
- Communicates with TWMs directly through plastic case; wireless electromagnetic induction saves waterproof connectors
- Communicates through the top of integrated TWM rotor cases; no cover removal required

ICD-HP Programmer

Height: 21 cm
Width: 9 cm
Depth: 5 cm

Packaged in an outdoor carrying case, this complete kit includes probes, an induction cup, cable, a USB power cable for bench use, and four AA batteries for fieldwork.

ICD-HP PROGRAMMER

ROTOR SOLUTIONS FOR EVERY GOLF COURSE

TTS-800 SERIES: THE MOST ADVANCED ROTORS IN THE GOLF INDUSTRY

Over the last four decades, Hunter Industries has built a longstanding reputation for innovation in the golf industry. Some of our revolutionary inventions include the first Windows-based central control system, the first Total-Top-Service (TTS) rotors, the first Decoder-in-Head (DIH) rotors with integrated Pilot Two-Way Modules, and the powerful and water-efficient G-85 Gear Drives.

Our newest products in this groundbreaking lineup are the TTS-800 Series Golf Rotors — the most innovative and technologically advanced rotors in the industry. Combining accuracy and power, they provide maximum uniformity and longevity in the field. They also reduce the challenges of reclaimed water use or poor water quality, thanks to their high-torque gear drives. The fast-access flange compartment is the golf sector's largest, and it can accommodate full-sized DBRY-6 Splice Connectors. Even routine maintenance is a breeze with Total-Top-Serviceability, which allows for solenoid and pressure regulator servicing without mainline depressurisation.

Whether your golf rotor needs fall into our budget-conscious B Series, advanced G-800 Series, or top-of-the-line TTS-800 Series, Hunter Industries offers a full range of solutions that will exceed your expectations and ensure beautiful, playable courses for years to come.

GOLF ROTORS

Look for this icon. All Hunter Golf rotors are 100% water-tested to ensure reliable operation once installed.

UNIFORMITY **YOU CAN COUNT ON**

Playability and water efficiency go hand-in-hand when it comes to golf course management. This means great distribution uniformity and proper irrigation scheduling are crucial to ensuring world-class performance and beautiful results.

Healthy, playable turf starts with top-level irrigation products — like Hunter's ultra-reliable TTS-800 Series Golf Rotors with superior distribution uniformity. Coupled with the best support team in the business, Hunter's golf solutions are second to none.

At Hunter Golf, we pride ourselves on providing products that set the standard in efficiency. Each year, we work directly with golf course superintendents worldwide to conduct comprehensive irrigation system audits that maximise water savings, reduce operating costs, and enhance the golf experience for players and course managers alike.

For best-in-class performance and enhanced playability, choose Hunter Golf.

BEST-IN-CLASS GEAR DRIVES THAT SET THE STANDARD FOR PLAYABILITY

TTS-800 Series Golf Rotors

LEADING THE WAY WITH POWER, PERFORMANCE, AND VERSATILITY

We've spent decades of research and millions of dollars to develop the best gear drives in the golf industry. When we introduced the G-85 Gear Drive, it quickly earned the respect of golf superintendents for its powerful performance and unmatched reliability. It also became known for its exceptional versatility, which boosted its popularity even more. That's because the adjustable arc drive with triple forward-facing nozzles can be adjusted not only to a non-reversing, full-circle rotation. It also can be configured at the factory as a G-84 Gear Drive in an opposing-nozzle, full-circle configuration.

But we didn't stop there. Next, we added the direct-drive G-80 — a hybrid version that blends the G-85's outstanding platform with the proven G-80 Gearbox to create the best full-circle drive for the golf sector. Today, this revolutionary gear drive technology powers our full range of TTS-800 Series, G-800 Series, and B Series Golf Rotors. No matter which rotor is best for your golf irrigation needs, you can rest assured knowing that the most powerful gear drives in the industry will deliver long-lasting performance in every application.

GREATER FLEXIBILITY WITH DUAL-TRAJECTORY NOZZLES

Standard Nozzles

Low-Angle Nozzles

To ensure precise distribution uniformity, we created a dedicated set of short- and mid-range nozzles to complement our gear drives. When combined with the primary nozzles that the G-80, G-84, and G-85 share, they deliver precise targeting for any application.

Choose from a wide assortment of wind-fighting 22.5° standard trajectory nozzles or 15° low-angle trajectory nozzles. For maximum throw, uniform distribution, and reliable performance under any condition, Hunter gear drives offer everything you need.

TTS-800 SERIES GOLF ROTORS

ADVANCED FEATURES

With Total-Top-Service (TTS) Technology

Access Everything Through the Top

This no-dig solution is appreciated by golfers, management, and especially the superintendent

Large and Flexible Yardage Marker Capabilities

Oversized marker plates with standard black or red, white, blue, and purple options

Largest Flange VIH Compartment in the Industry

Spacious cavity with enough room for full-sized DBRY-6 Splice Connectors

Unitised Inlet Valve Design Includes Serviceable Components

Contamination damage is quickly resolved with replaceable valve seat and seat seal

Easy Access and Servicing of Solenoid and Pressure Regulators

Colour-coded components are removed and replaced without mainline depressurisation

Exclusive Inlet Valve Includes Self-Cleaning Capabilities

Proprietary Filter Sentry™ Mechanism wipes debris from the stainless steel screen with every activation

Single-Point Fast-Access to Flange Compartment

Extra-thick compartment lid is retained with stainless steel ¼-turn fastener

Two-Stage Serviceable Filtration in Valve Circuitry

Oversized stainless steel screens at inlet valve and pilot valve are easily cleaned or replaced

Heavy-Duty Flanged and Ribbed Body Design

Impact-resistant and ultra-durable design includes extra-strength PVC Acme inlet

Three Cable Entry Ports at Base of Flange Compartment

Makes splice and cable connections fast, easy, and organised

Low-Bounce Rubber Cover Kit

Impact-absorbing design reduces ball ricochet around the greens

No-Bounce Turf Cup Kit

Recessed turf cup design is aesthetically clean and eliminates ball ricochet

Access Everything, Including Two-Way Modules, Through the Top

This no-dig solution is appreciated by golfers, management, and especially the superintendent

Largest Flange DIH Compartment in the Industry

Spacious cavity with enough room for Pilot™ Two-Way Modules and full-sized DBRY-6 Splice Connectors

Two-Way Modules Are Housed in the DIH Rotor's Spacious Flange Compartment

Improves playability and eliminates unsightly enclosures around the course

Programming Two-Way Modules Wirelessly From the Surface with No Disassembly

Quick and easy to program and perform diagnostics before or after installation with ICD-HP Programmer

TTS-800 SERIES GOLF ROTORS

ADVANCED FEATURES

With Integrated Two-Way Modules

Individual Two-Way Module and Solenoid Components Within Flange Compartment

Isolated/separated configuration minimises yearly maintenance costs

Two-Station DIH Rotor Option

Perfect cost-effective solution for back-to-back heads around greens

State-of-the-Art Surge Suppression

Earth grounding is easily added with the Pilot Surge Suppressor

DIH Rotors Include All the Unique Features and Benefits of TTS Rotors

Makes splice and cable connections fast, easy, and clean

Seamless, No-Splice Connection Between Two-Way Module and Solenoid

Maintains ongoing electrical continuity with no connectors required

Durability, Efficiency, and Reliability from the Makers of the Industry's First TTS and DIH Rotors

Peace of mind from the world's leading producer of gear-driven rotors

TTS-800 SERIES

These rotors have Total-Top-Serviceability, powerful, high-torque gear drives, and the largest flange compartment in the industry to accommodate all Pilot™ Two-Way Module components.

KEY BENEFITS

- Dedicated, true full-circle model distinguished by a black collar
- Extra-large, fast-access flange compartment to accommodate full-size DBRY-6 Splice Connectors and an integrated Pilot Two-Way Module
- Solenoid and pressure regulator are serviceable without system depressurisation
- Exclusive PressurePort™ Technology optimises incoming pressure at each nozzle to increase consistency and maximise distribution uniformity
- High-torque gear drive is the strongest in the industry to mitigate the challenges of debris infiltration
- Proprietary Filter Sentry™ Mechanism cleans the filter with every opening and closing cycle
- All TTS-800 Series Golf Rotors advanced features listed on **pages 18 to 21**

GT-880

Pop-up height: 9.5 cm
Overall height: 30 cm
Flange diameter: 18 cm
Female inlet: 1½" (40 mm) Acme

OPERATING SPECIFICATIONS

- Radius: 14.9 to 29.6 m
- Flow: 3.23 to 13.29 m³/hr; 53.8 to 221.4 l/min
- Pressure range: 3.4 to 6.9 bar; 340 to 690 kPa
- All TTS rotors are pressure-rated at 10 bar; 1,000 kPa
- Nozzle range: 15 to 53
 - 10 standard trajectory (22.5°) nozzles
 - 9 low-angle trajectory (15°) nozzles

OPTIONS

- C - Check-O-Matic Technology checks up to 8 m in elevation change and readily converts to normally open hydraulic with through-the-top connections
- D - Decoder Valve-in-Head Technology with all "E" specifications below*
- DD - Two-station decoder Valve-in-Head Technology with all "E" specifications below*
- E - Electric Valve-in-Head Technology with adjustable pressure regulation, on-off-auto selector, 210 mA (370 mA inrush) 50 Hz; 190 mA (350 mA inrush) 60 Hz solenoid with captive plunger and internal downstream bleed

* All DIH rotors include two DBRY-6 Splice Connectors for connection to the two-wire path. See **page 11** for critical recommendations on grounding DIH rotors.

GT-880 - SPECIFICATION BUILDER: ORDER 1 + 2 + 3 + 4

1 Model	2 Valve Options	3 Nozzle	4 Regulation
GT-880 = Full-circle	<p>C = Check-O-Matic Technology*</p> <p>D = Decoder Valve-in-Head Technology</p> <p>DD = Two-station decoder Valve-in-Head Technology</p> <p>E = Electric Valve-in-Head Technology</p> <p><i>*Converts to N.O. hydraulic Valve-in-Head Technology</i></p>	15 to 53 = Installed G-880 nozzle	<p>P5 = 50 PSI; 3.4 bar; 340 kPa (nozzles 15 to 18)</p> <p>P6 = 65 PSI; 4.5 bar; 450 kPa (nozzles 18 to 25)</p> <p>P8 = 80 PSI; 5.5 bar; 550 kPa (nozzles 25 to 53)</p>

Example:

* Complies to ASAE standard. All precipitation rates calculated for 360° operation. All triangular rates are equilateral. To calculate precipitation rates for 180° operation, multiply by 2.

GT-880 STANDARD NOZZLES GT-880 LOW-ANGLE NOZZLES**

** Low-angle nozzles reduce the radius by 15%.

Easy-Access Servicing

An extra-thick compartment lid is retained with a ¼-turn, stainless steel, single-point fastener.

Spacious Flange Compartment

The largest and deepest compartment in the industry offers plenty of room for full-sized DBRY-6 Splice Connectors.

TTS-800 SERIES

These rotors have Total-Top-Serviceability, powerful, high-torque gear drives, and the largest flange compartment in the industry to accommodate all Pilot™ Two-Way Module components.

KEY BENEFITS

- Adjustable model distinguished by a grey collar that comes factory set in a true full-circle configuration
- Extra-large, fast-access flange compartment to accommodate full-size DBRY-6 Splice Connectors and an integrated Pilot Two-Way Module
- Solenoid and pressure regulator are serviceable without system depressurisation
- Exclusive PressurePort™ Technology optimises incoming pressure at each nozzle to increase consistency and maximise distribution uniformity
- High-torque gear drive is the strongest in the industry to mitigate the challenges of debris infiltration
- Proprietary Filter Sentry™ Mechanism cleans the filter with every opening and closing cycle
- All TTS-800 Series Golf Rotors advanced features listed on **pages 18 to 21**

GT-884

Pop-up height: 9.5 cm
Overall height: 30 cm
Flange diameter: 18 cm
Female inlet: 1/2" (40 mm) Acme

OPERATING SPECIFICATIONS

- Radius: 14.9 to 29.6 m
- Flow: 3.23 to 13.29 m³/hr; 53.8 to 221.4 l/min
- Pressure range: 3.4 to 6.9 bar; 340 to 690 kPa
- All TTS rotors are pressure-rated at 10 bar; 1,000 kPa
- Nozzle range: 15 to 53
 - 10 standard trajectory (22.5°) nozzles
 - 9 low-angle trajectory (15°) nozzles

OPTIONS

- C - Check-O-Matic Technology checks up to 8 m in elevation change and readily converts to normally open hydraulic with through-the-top connections
- D - Decoder Valve-in-Head Technology with all "E" specifications below*
- DD - Two-station decoder Valve-in-Head Technology with all "E" specifications below*
- E - Electric Valve-in-Head Technology with adjustable pressure regulation, on-off-auto selector, 210 mA (370 mA inrush) 50 Hz; 190 mA (350 mA inrush) 60 Hz solenoid with captive plunger and internal downstream bleed

* All DIH rotors include two DBRY-6 Splice Connectors for connection to the two-wire path. See **page 11** for critical recommendations on grounding DIH rotors.

GT-884 STANDARD NOZZLES GT-884 LOW-ANGLE NOZZLES**

** Low-angle nozzles reduce the radius by 15%.

Room to Spare
 Adding a Pilot™ Two-Way Module does not reduce flange compartment space. The exclusive configuration provides extra room for full-sized DBRY-6 Splice Connectors and multiple cables.

TTS-800 SERIES

These rotors have Total-Top-Serviceability, powerful, high-torque gear drives, and the largest flange compartment in the industry to accommodate all Pilot™ Two-Way Module components.

KEY BENEFITS

- Adjustable model distinguished by a grey collar that comes factory set in a part-circle configuration (60° to 360°)
- Extra-large, fast access flange compartment to accommodate full-size DBRY-6 Splice Connectors and an integrated Pilot Two-Way Module
- Solenoid and pressure regulator are serviceable without system depressurisation
- Exclusive PressurePort™ Technology optimises incoming pressure at each nozzle to increase consistency and maximise distribution uniformity
- High-torque gear drive is the strongest in the industry to mitigate the challenges of debris infiltration
- Proprietary Filter Sentry™ Mechanism cleans the filter with every opening and closing cycle
- All TTS-800 Series Golf Rotors advanced features listed on **pages 18 to 21**

OPERATING SPECIFICATIONS

- Radius: 11.3 to 28.7 m
- Flow: 2.02 to 13.54 m³/hr; 33.7 to 225.6 l/min
- Pressure range: 3.4 to 6.9 bar; 340 to 690 kPa
- All TTS rotors are pressure-rated at 10 bar; 1,000 kPa
- Nozzle range: 10 to 53
 - 12 standard trajectory (22.5°) nozzles
 - 9 low-angle trajectory (15°) nozzles

OPTIONS

- C - Check-O-Matic Technology checks up to 8 m in elevation change and readily converts to normally open hydraulic with through-the-top connections
- D - Decoder Valve-in-Head Technology with all “E” specifications below*
- DD - Two-station decoder Valve-in-Head Technology with all “E” specifications below*
- E - Electric Valve-in-Head Technology with adjustable pressure regulation, on-off-auto selector, 210 mA (370 mA inrush) 50 Hz; 190 mA (350 mA inrush) 60 Hz solenoid with captive plunger and internal downstream bleed

* All DIH rotors include two DBRY-6 Splice Connectors for connection to the two-wire path. See **page 11** for critical recommendations on grounding DIH rotors.

GT-885 STANDARD NOZZLES

GT-885 LOW-ANGLE NOZZLES**

** Low-angle nozzles reduce the radius by 15%.

Reduced Downtime

There is no need to depressurise the mainline for solenoid and pressure regulator servicing.

Total-Top-Service Solution

From the originators of TTS Technology, Hunter's no-dig TTS-800 Series Golf Rotators provide total-top-servicing of every serviceable component.

TTS-800 SERIES

These rotors have Total-Top-Serviceability, shorter-radius, lower-flow internals, and the largest flange compartment in the industry to accommodate all Pilot™ Two-Way Module components.

KEY BENEFITS

- Adjustable, shorter-radius model (50° to 360°)
- Extra-large, fast-access flange compartment to accommodate full-size DBRY-6 Splice Connectors and an integrated Pilot Two-Way Module
- Solenoid and pressure regulator are serviceable without system depressurisation
- Proprietary Filter Sentry™ Mechanism cleans the filter with every opening and closing cycle
- All TTS-800 Series Golf Rotors advanced features listed on **pages 18 to 21**

OPERATING SPECIFICATIONS

- Radius: 5.5 to 15.2 m
- Flow: 0.43 to 2.91 m³/hr; 7.2 to 48.5 l/min
- Pressure range: 2.8 to 4.5 bar; 280 to 450 kPa
- All TTS rotors are pressure-rated at 10 bar; 1,000 kPa
- Nozzle range: 2 to 12

OPTIONS

- C – Check-O-Matic Technology checks up to 8 m in elevation change and readily converts to normally open hydraulic with through-the-top connections
- D – Decoder Valve-in-Head Technology with all “E” specifications below*
- DD – Two-station decoder Valve-in-Head Technology with all “E” specifications below*
- E – Electric Valve-in-Head Technology with adjustable pressure regulation, on-off-auto selector, 210 mA (370 mA inrush) 50 Hz; 190 mA (350 mA inrush) 60 Hz solenoid with captive plunger and internal downstream bleed

* All DIH rotors include two DBRY-6 Splice Connectors for connection to the two-wire path. See **page 11** for critical recommendations on grounding DIH rotors.

GT-835

Pop-up height: 8 cm
Overall height: 30 cm
Flange diameter: 18 cm
Female inlet: 1½" (40 mm) Acme

GT-835 – SPECIFICATION BUILDER: ORDER 1 + 2 + 3 + 4

1 Model	2 Valve Options	3 Nozzle	4 Regulation
GT-835 = Full/part-circle, 50° to 360°	<p>C = Check-O-Matic Technology*</p> <p>D = Decoder Valve-in-Head Technology</p> <p>E = Electric Valve-in-Head Technology</p> <p>*Converts to N.O. hydraulic Valve-in-Head Technology</p>	6 = Installed G-835 nozzle (includes 8-nozzle rack)	<p>P5 = 50 PSI; 3.4 bar; 340 kPa (nozzles 18 to 25)</p> <p>P6 = 65 PSI; 4.5 bar; 450 kPa (nozzles 18 to 25)</p>

Example:

GT-835-6-P5 = GT-835 full/part-circle electric Valve-in-Head Technology, installed 6 nozzle, 50 PSI; 3.4 bar; 340 kPa regulation

* Complies to ASAE standard. All precipitation rates calculated for 360° operation. All triangular rates are equilateral. To calculate precipitation rates for 180° operation, multiply by 2.

GT-835 NOZZLES

Optional Yardage Marker Colours

Extra-large, snap-in marker plates are available in standard black as well as optional red, white, and blue to meet every golf course preference. Or choose the purple plate for identification when courses are using reclaimed water.

Low-Bounce Rubber Cover Kit - P/N 987200SP

Reduce the incoming bounce from balls hitting rotors that are surrounding the greens.

No-Bounce Turf Cup Kit - P/N 987100SP

Eliminate errant bounces from balls hitting greens-surrounding rotors with this subsurface rotor-mounting solution.

G-800 SERIES

These rotors feature convenient, no-dig Total-Top-Serviceability and a powerful, high-torque gear drive.

KEY BENEFITS

- Dedicated, true full-circle model distinguished by a black collar
- Exclusive PressurePort™ Technology optimises incoming pressure at each nozzle to increase consistency and maximise distribution uniformity
- High-torque gear drive is the strongest in the industry to mitigate the challenges of debris infiltration
- Proprietary Filter Sentry™ Mechanism cleans the filter with every opening and closing cycle

OPERATING SPECIFICATIONS

- Radius: 14.9 to 29.6 m
- Flow: 3.23 to 13.29 m³/hr; 53.8 to 221.4 l/min
- Pressure range: 3.4 to 6.9 bar; 340 to 690 kPa
- All TTS rotors are pressure-rated at 10 bar; 1,000 kPa
- Nozzle range: 15 to 53
 - 10 standard trajectory (22.5°) nozzles
 - 9 low-angle trajectory (15°) nozzles

OPTIONS

- C - Check-O-Matic Technology checks up to 8 m in elevation change and readily converts to normally open hydraulic with through-the-top connections
- D - Decoder Valve-in-Head Technology with all “E” specifications below*
- DD - Two-station decoder Valve-in-Head Technology with all “E” specifications below*
- E - Electric Valve-in-Head Technology with adjustable pressure regulation, on-off-auto selector, 210 mA (370 mA inrush) 50 Hz; 190 mA (350 mA inrush) 60 Hz solenoid with captive plunger and internal downstream bleed

* All DIH rotors include two DBRY-6 Splice Connectors for connection to the two-wire path. See **page 11** for critical recommendations on grounding DIH rotors.

G-880 STANDARD NOZZLES

G-880 LOW-ANGLE NOZZLES**

** Low-angle nozzles reduce the radius by 15%.

TTS Means Convenience and Versatility

With TTS Technology, every serviceable component of the rotor can be easily accessed anytime with no servicing mess.

G-800 SERIES

These rotors feature convenient, no-dig Total-Top-Serviceability and a powerful, high-torque gear drive.

KEY BENEFITS

- Adjustable model distinguished by a grey collar that comes factory set in a true full-circle configuration
- Exclusive PressurePort™ Technology optimises incoming pressure at each nozzle to increase consistency and maximise distribution uniformity
- High-torque gear drive is the strongest in the industry to mitigate the challenges of debris infiltration
- Proprietary Filter Sentry™ Mechanism cleans the filter with every opening and closing cycle

OPERATING SPECIFICATIONS

- Radius: 14.9 to 29.6 m
- Flow: 3.23 to 13.29 m³/hr; 53.8 to 221.4 l/min
- Pressure range: 3.4 to 6.9 bar; 340 to 690 kPa
- All TTS rotors are pressure-rated at 10 bar; 1,000 kPa
- Nozzle range: 15 to 53
 - 10 standard trajectory (22.5°) nozzles
 - 9 low-angle trajectory (15°) nozzles

OPTIONS

- C - Check-O-Matic Technology checks up to 8 m in elevation change and readily converts to normally open hydraulic with through-the-top connections
- D - Decoder Valve-in-Head Technology with all “E” specifications below*
- DD - Two-station decoder Valve-in-Head Technology with all “E” specifications below*
- E - Electric Valve-in-Head Technology with adjustable pressure regulation, on-off-auto selector, 210 mA (370 mA inrush) 50 Hz; 190 mA (350 mA inrush) 60 Hz solenoid with captive plunger and internal downstream bleed

* All DIH rotors include two DBRY-6 Splice Connectors for connection to the two-wire path. See **page 11** for critical recommendations on grounding DIH rotors.

* Complies to ASAE standard. All precipitation rates calculated for 360° operation. All triangular rates are equilateral. To calculate precipitation rates for 180° operation, multiply by 2.

G-884 STANDARD NOZZLES

G-884 LOW-ANGLE NOZZLES**

** Low-angle nozzles reduce radius by 15%

G-885 Rotor with Total-Top-Serviceability and Decoder-in-Head Technology

TTS Flange Compartment

All TTS rotors include ample room for solenoid splice connections and a Pilot™ Two-Way Module when needed.

G-800 SERIES

These rotors feature convenient, no-dig Total-Top-Serviceability and a powerful, high-torque gear drive.

KEY BENEFITS

- Adjustable model distinguished by a grey collar that comes factory set in a part-circle configuration (60° to 360°)
- Exclusive PressurePort™ Technology optimises incoming pressure at each nozzle to increase consistency and maximise distribution uniformity
- High-torque gear drive is the strongest in the industry to mitigate the challenges of debris infiltration
- Proprietary Filter Sentry™ Mechanism cleans the filter with every opening and closing cycle

OPERATING SPECIFICATIONS

- Radius: 11.3 to 28.7 m
- Flow: 2.02 to 13.54 m³/hr; 33.7 to 225.6 l/min
- Pressure range: 3.4 to 6.9 bar; 340 to 690 kPa
- All TTS rotors are pressure-rated at 10 bar; 1,000 kPa
- Nozzle range: 10 to 53
 - 12 standard trajectory (22.5°) nozzles
 - 9 low-angle trajectory (15°) nozzles

OPTIONS

- C - Check-O-Matic Technology checks up to 8 m in elevation change and readily converts to normally open hydraulic with through-the-top connections
- D - Decoder Valve-in-Head Technology with all “E” specifications below*
- DD - Two-station decoder Valve-in-Head Technology with all “E” specifications below*
- E - Electric Valve-in-Head Technology with adjustable pressure regulation, on-off-auto selector, 210 mA (370 mA inrush) 50 Hz; 190 mA (350 mA inrush) 60 Hz solenoid with captive plunger and internal downstream bleed

* All DIH rotors include two DBRY-6 Splice Connectors for connection to the two-wire path. See **page 11** for critical recommendations on grounding DIH rotors.

GT-885/G-885 CONTOUR BACK-NOZZLES

QuickSet-360 with Ratcheting Riser

Setting up your adjustable arc TTS rotor is fast and simple. The integrated ratcheting mechanism allows a simple twist of the riser to align the right-side reversing point. These rotors are also easily convertible to a true non-reversing full-circle with our exclusive QuickSet-360 feature.

G-800 SERIES

These rotors feature convenient, no-dig Total-Top-Serviceability and a shorter-radius, lower-flow internal.

KEY BENEFITS

- Adjustable, shorter-radius model (50° to 360°)
- Proprietary Filter Sentry™ Mechanism cleans the filter with every opening and closing cycle

OPERATING SPECIFICATIONS

- Radius: 5.5 to 15.2 m
- Flow: 0.43 to 2.91 m³/hr; 7.2 to 48.5 l/min
- Pressure range: 2.8 to 4.5 bar; 280 to 450 kPa
- All TTS rotors are pressure-rated at 10 bar; 1,000 kPa
- Nozzle range: 2 to 12

OPTIONS

- C - Check-O-Matic Technology checks up to 8 m in elevation change and readily converts to normally open hydraulic with through-the-top connections
- D - Decoder Valve-in-Head Technology with all “E” specifications below*
- DD - Two-station decoder Valve-in-Head Technology with all “E” specifications below*
- E - Electric Valve-in-Head Technology with adjustable pressure regulation, on-off-auto selector, 210 mA (370 mA inrush) 50 Hz; 190 mA (350 mA inrush) 60 Hz solenoid with captive plunger and internal downstream bleed

* All DIH rotors include two DBRY-6 Splice Connectors for connection to the two-wire path. See **page 11** for critical recommendations on grounding DIH rotors.

QuickSet-360

With Hunter's QuickCheck Arc Mechanism and patented QuickSet-360 non-reversing full-circle feature in a variable arc rotor, adjustments are fast, easy, and more flexible than ever before. Now available on all TTS-800 Series, G-800 Series, and B Series adjustable arc rotors.

B SERIES

These highly efficient block rotors have a powerful gear drive backed by the reliability synonymous with the Hunter name.

KEY BENEFITS

- Dedicated, true full-circle model distinguished by a black collar
- Exclusive PressurePort™ Technology optimises incoming pressure at each nozzle to increase consistency and maximise distribution uniformity
- High-torque gear drive is the strongest in the industry to mitigate the challenges of debris infiltration

OPERATING SPECIFICATIONS

- G-80-B
 - Radius: 14.9 to 29.6 m
 - Flow: 3.23 to 13.29 m³/hr; 53.8 to 221.4 l/min
 - Pressure range: 3.4 to 6.9 bar; 340 to 690 kPa
- All B Series Golf Rotors are pressure-rated at 10 bar; 1,000 kPa
- Check height up to 2 m in elevation change
- Nozzle range: 15 to 53
 - 10 standard trajectory (22.5°) nozzles
 - 9 low-angle trajectory (15°) nozzles

G-80-B

Pop-up height: 9.5 cm

G-80-B NOZZLES

LOW-ANGLE NOZZLES**

** Low-angle nozzles reduce the radius by 15%.

* Complies to ASAE standard. All precipitation rates calculated for 360° operation. All triangular rates are equilateral.

B SERIES

These highly efficient block rotors have a powerful gear drive backed by the reliability synonymous with the Hunter name.

KEY BENEFITS

- G-84-B
 - Adjustable model distinguished by a grey collar that comes factory set in a true full-circle configuration
 - Exclusive PressurePort™ Technology optimises incoming pressure at each nozzle to increase consistency and maximise distribution uniformity
 - High-torque gear drive is the strongest in the industry to mitigate the challenges of debris infiltration
- G-85-B
 - Adjustable model distinguished by a grey collar that comes factory set in a part-circle configuration (60° to 360°)
 - Exclusive PressurePort™ Technology optimises incoming pressure at each nozzle to increase consistency and maximise distribution uniformity
 - High-torque gear drive is the strongest in the industry to mitigate the challenges of debris infiltration

G-84-B

Pop-up height: 9.5 cm
Overall height: 24.5 cm
Flange diameter: 13.7 cm
Female inlet: 1¼" (30 mm) Acme

G-85-B

Pop-up height: 9.5 cm
Overall height: 24.5 cm
Flange diameter: 13.7 cm
Female inlet: 1¼" (30 mm) Acme

OPERATING SPECIFICATIONS

- G-84-B
 - Radius: 14.9 to 29.6 m
 - Flow: 3.23 to 13.29 m³/hr; 53.8 to 221.4 l/min
 - Pressure range: 3.4 to 6.9 bar; 340 to 690 kPa
 - Check height up to 2 m in elevation change
 - Nozzle range: 15 to 53
 - 10 standard trajectory (22.5°) nozzles
 - 9 low-angle trajectory (15°) nozzles
- G-85-B
 - Radius: 11.3 to 28.7 m
 - Flow: 2.02 to 13.54 m³/hr; 33.7 to 225.6 l/min
 - Pressure range: 3.4 to 6.9 bar; 340 to 690 kPa
 - Check height up to 2 m in elevation change
 - Nozzle range: 10 to 53
 - 12 standard trajectory (22.5°) nozzles
 - 9 low-angle trajectory (15°) nozzles
- All B Series Golf Rotors are pressure-rated at 10 bar; 1,000 kPa

G-84-B & G-85-B - SPECIFICATION BUILDER: ORDER 1 + 2 + 3 + 4

1 Model	2 Valve Options	3 Nozzle	4 Options*
G-84 = Full-circle	B = Block rotor with check valve	15 to 53 = Installed G84 nozzle* *SSU = 18, 25, or 48	S = SSU* *Standard stocking unit
G-85 = Full/part-circle, 60° to 360°	B = Block rotor with check valve	10 to 53 = Installed G85 nozzle** **SSU = 18, 25, or 48	S = SSU* *Standard stocking unit

Example:

G-85-B-25-S = G-85 part-circle block rotor, installed 25 nozzle, standard stocking unit model

● = Nozzle plug P/N 315300 installed in the back side of the nozzle housing.
 * Complies to ASAE standard. All precipitation rates calculated for 360° operation. All triangular rates are equilateral.

** Low-angle nozzles reduce radius by 15%.

B SERIES

These cost-effective block rotors have shorter-radius, lower-flow nozzles for use in smaller areas.

KEY BENEFITS

- Adjustable, shorter-radius model (50° to 360°)

OPERATING SPECIFICATIONS

- Radius: 5.5 to 15.2 m
- Flow: 0.43 to 2.91 m³/hr; 7.2 to 48.5 l/min
- Pressure range: 2.8 to 4.5 bar; 280 to 450 kPa
- All B Series Golf Rotors are pressure-rated at 10 bar; 1,000 kPa
- Check height up to 2 m in elevation change
- Nozzle range: 2 to 12

G-35-B

Pop-up height: 8 cm
Overall height: 23 cm
Flange diameter: 12 cm
Female inlet: 1/4" (30 mm) Acme

G-35-B NOZZLES

* Complies to ASAE standard. All precipitation rates calculated for 360° operation. All triangular rates are equilateral. To calculate precipitation rates for 180° operation, multiply by 2.

G-35-B ROTOR

G-900 SERIES

These rotors are simple to install and perfect for retrofits. Total-Top-Serviceability makes field maintenance quick and easy.

KEY BENEFITS

- G-990 is a dedicated, true full-circle model
- G-995 is an adjustable part-circle model (40° to 360°)
- Higher-flow, longer-radius rotor designed for single-row systems
- Contour back-nozzle capability for special applications

OPERATING SPECIFICATIONS

- G-990
 - Radius: 27.1 to 31.4 m
 - Flow: 12.31 to 18.92 m³/hr; 205.2 to 315.3 l/min
 - Pressure range: 5.5 to 8.3 bar; 550 to 830 kPa
- G-995
 - Radius: 24.7 to 29.6 m
 - Flow: 12.47 to 19.04 m³/hr; 207.8 to 317.2 l/min
 - Pressure range: 5.5 to 8.3 bar; 550 to 830 kPa
- All TTS rotors are pressure-rated at 10 bar; 1,000 kPa
- Check height up to 2 m in elevation change
- Nozzle range: 53 to 73
 - 3 standard trajectory (22.5°) nozzles
 - 3 low-angle trajectory (15°) nozzles

OPTIONS

- C - Check-O-Matic Technology checks up to 8 m in elevation change and readily converts to normally open hydraulic with through-the-top connections
- D - Decoder Valve-in-Head Technology with all "E" specifications below*
- DD - Two-station decoder Valve-in-Head Technology with all "E" specifications below*
- E - Electric Valve-in-Head Technology with adjustable pressure regulation, on-off-auto selector, 210 mA (370 mA inrush) 50 Hz; 190 mA (350 mA inrush) 60 Hz solenoid with captive plunger and internal downstream bleed

* All DIH rotors include two DBRY-6 Splice Connectors for connection to the two-wire path. See **page 11** for critical recommendations on grounding DIH rotors.

G-990C

Pop-up height: 8 cm
Overall height: 34 cm
Flange diameter: 19 cm
Female inlet: 1/2" (40 mm) Acme

G-995E

Pop-up height: 8 cm
Overall height: 34 cm
Flange diameter: 19 cm
Female inlet: 1/2" (40 mm) Acme

G-900 LOW-ANGLE NOZZLES**

** Low-angle nozzles reduce the radius by 15%.

* Complies to ASAE standard. All precipitation rates calculated for 360° operation. All triangular rates are equilateral. To calculate precipitation rates for 180° operation, multiply by 2.

Contour Back-Nozzle Capabilities

Choose any nozzle from the I-40 and G-70 nozzle racks, or from the short- and mid-range G-900 nozzles.

SWING JOINTS AND ACCESSORIES

HSJ SWING JOINTS

ADVANCED FEATURES

PROVEN PRODUCTS, PROVEN PARTNERS

Over the last four decades, Hunter has become the leading producer of gear-driven rotors, known worldwide for its quality product and excellent customer support. Similarly, LASCO has spent the last 50 years developing a reputation as the industry's leading producer of PVC irrigation fittings and swing joints, providing outstanding customer support in the golf irrigation market. When Hunter sought a partner for its Hunter-branded swing joints, the choice was immediately clear.

We are proud to offer Hunter HSJ Swing Joints by LASCO — a proven team with time-tested solutions for the golf irrigation market. HSJs are available in a multitude of inlet, outlet, size, and length configurations for every course and preference.

UPGRADE YOUR ROTOR WARRANTY

Include Hunter HSJ Swing Joints with your golf rotor order and qualify for a 5-year component exchange warranty. HSJ Swing Joints must be purchased from an authorised Hunter Golf Distributor to qualify.

LASCO is a trademark of LASCO Fittings Inc.

HSJ SWING JOINTS

With swivel ells on both ends, HSJ Swing Joints easily adjust sprinklers to proper height and position in any configuration.

KEY BENEFITS

- Strength, longevity, and contamination resistance
 - Prefabricated PVC design with O-Ring Seals
- Configurations to meet every installation requirement
 - Available in all popular inlet and outlet configurations
 - Choose from 20 cm, 30 cm, or 46 cm lay arm lengths
 - Single top-out or triple top-out designs

Swing Joints

- HSJ-0 = Model ¾"
- HSJ-1 = Model 1" (25 mm)
- HSJ-2 = Model 1¼" (30 mm)
- HSJ-3 = Model 1½" (40 mm)

SWING JOINT – SPECIFICATION BUILDER: ORDER 1 + 2 + 3 + 4 + 5

1 Model	2 Inlet Type (from pipe fitting)	3 Outlet Type (to sprinkler inlet)	4 Outlet Style	5 Lay Length
HSJ-0 = ¾" commercial swing joint HSJ-1 = 1" (25 mm) heavy-duty swing joint HSJ-2 = 1¼" (30 mm) heavy-duty swing joint HSJ-3 = 1½" (40 mm) heavy-duty swing joint	3 = Male NPT 4 = Male Acme* 6 = Male BSP** 7 = Spigot, 10 cm long** B = Additional elbow for male BSP inlet, allows vertical mounting. QUICK COUPLERS

The sturdy red brass and stainless steel construction of Quick Couplers strengthens any project.

FEATURES

- 100% interchangeable with major brands
- Red brass and stainless steel construction
- Heavy-duty thermoplastic locking and non-locking covers
- Optional winged stabilisation and Acme key connection
- Stainless steel lug on 1" (25 mm) and 1¼" (30 mm) keys
- Spring-loaded covers with stainless steel springs for positive closing and protection of valve's sealing components
- Warranty period: 5 years

PRODUCTS FOR THE GOLF COURSE AND BEYOND

Everything we do at Hunter Industries is rooted in innovation. From small residential installations to fully automated smart cities, our teams continually develop solutions to help professionals deliver water as efficiently and sustainably as possible.

Whether it's water-saving MP Rotator™ Nozzles around a bunker or reliable I-20 Rotors on the surrounds or clubhouse grounds, Hunter's complete offering of commercial products has your course covered.

Automatic Matched Precipitation

MP Rotator Nozzles adjust the flow rate through the nozzle as the radius and arc are changed, resulting in the same matched precipitation rate regardless of the nozzle setting.

Performance You Can Depend On

From residential to commercial applications, high pressure to low pressure, and clean water to dirty water, Hunter valves keep systems running flawlessly day in and day out.

Efficient, Reliable Irrigation

Packed with upgraded features like FloStop™ Technology, check valves, and top-performing nozzles, the I-20 Rotor ensures efficient, reliable irrigation in a range of applications.

As we continue to explore new ways to innovate, you can expect us to deliver even more industry-leading products, services, and tools in the future to help your course thrive.

hunterindustries.com

I-20

The I-20 Rotor is loaded with upgraded features such as FloStop™ Technology, check valves, and efficient nozzles that make it the perfect choice in a range of applications.

KEY BENEFITS

- Patented automatic arc return feature returns the turret back to the original arc pattern if vandalised; adjustable arc from 50° to 360°
- Non-strippable drive mechanism is protected from damage if turned in the opposite direction of travel
- Part- and full-circle in one model is flexible for all landscapes and decreases inventory
- Headed and slotted setscrew allows radius adjustment with a Hunter Wrench or flat-blade screwdriver
- FloStop Technology closes the flow of water from individual sprinklers to change the nozzle or perform repairs
- Flat-top nozzles allow fast, easy insertion
- Drain Check Valve prevents low-head drainage (up to 3 m of elevation)

OPERATING SPECIFICATIONS

- Nozzle choices: 34
- Radius: 4.9 to 14.0 m
- Flow: 0.07 to 3.23 m³/hr; 1.2 to 53.8 l/min
- Recommended pressure range: 1.7 to 4.5 bar; 170 to 450 kPa
- Operating pressure range: 1.4 to 7.0 bar; 140 to 700 kPa
- Precipitation rate: 10 mm/hr approximately
- Nozzle trajectory: standard = 25°, low-angle = 13°
- Nozzle racks: 1.5 to 8.0 blue, 2.0 to 4.5 low-angle grey, 0.50 to 3.0 black, 6.0 to 13.0 green, MPR-25, MPR-30, MPR-35
- Warranty period: 5 years

I-20-04

hunter.info/NozzleSpecI20

I-25

The reliable, durable, and versatile I-25 Rotor offers an expansive nozzle selection that makes it the perfect choice for large turf applications.

KEY BENEFITS

- Patented automatic arc return feature returns the turret back to the original arc pattern if vandalised; adjustable arc from 50° to 360°
- Non-strippable drive mechanism is protected from damage if turned in the opposite direction of travel
- Part- and full-circle in one model for flexibility across landscapes and reduced inventory
- Colour-coded nozzles make identification easy
- Drain Check Valve prevents low-head drainage (up to 3 m of elevation)

OPERATING SPECIFICATIONS

- Nozzle choices: 11
- Radius: 11.9 to 21.6 m
- Flow: 0.82 to 7.24 m³/hr; 13.6 to 120.2 l/min
- Recommended pressure range: 2.5 to 7.0 bar; 250 to 700 kPa
- Warranty period: 5 years
- Operating pressure range: 2.5 to 7.0 bar; 250 to 700 kPa
- Precipitation rate: 15 mm/hr approximately
- Nozzle trajectory: standard = 25°

FACTORY-INSTALLED OPTIONS

- Reclaimed water ID
- High-speed rotation

USER-INSTALLED OPTIONS

- HSJ-1 prefabricated 1" (25 mm) PVC Swing Joint

I-25 Reclaimed
Available as a factory-installed option on all models

I-25-04
Overall height: 20 cm
Pop-up height: 10 cm
Exposed diameter: 5 cm
Inlet size: 1" (25 mm) BSP

I-25-06
Overall height: 26 cm
Pop-up height: 15 cm
Exposed diameter: 5 cm
Inlet size: 1" (25 mm) BSP

MP ROTATOR™ NOZZLES

The MP Rotator Nozzle is the most trusted high-efficiency solution on the market, offering up to 30% water savings over traditional spray nozzles.

KEY BENEFITS

- Lowest precipitation rate in the industry of approximately 10 mm/hr
- Matched precipitation for simplified irrigation design and flexibility
- Double-pop feature protects the nozzle from external debris
- High distribution uniformity for a healthy landscape with maximum water efficiency

ADDITIONAL FEATURES

- Wind-resistant, multi-stream technology prevents misting
- Arc adjustments allowed only when running to deter vandalism
- Removable filter screen keeps nozzle from clogging
- Colour-coded for easy identification

OPERATING SPECIFICATIONS

- Radius reduction up to approximately 25% on all models
- Recommended operating pressure: 2.8 bar; 280 kPa
- Minimum radius setting achieved at 2.1 bar; 210 kPa
- Warranty period: 3 years

OPTIONS

- Pair with Pro-Spray™ PRS40 Sprinkler Body for pressure regulation to 2.8 bar; 280 kPa for nominal radius settings
- Pair with Pro-Spray PRS30 Sprinkler Body for pressure regulation to 2.1 bar; 210 kPa for minimum radius settings

PRO-SPRAY™ PRS40

To optimise MP Rotator Nozzle performance, the Pro-Spray PRS40 Sprinkler Body is pressure-regulated to 2.8 bar; 280 kPa.

KEY BENEFITS

- Industry's strongest sprinkler body for years of reliable performance
- Pressure-regulated to 2.8 bar; 280 kPa for the MP Rotator Nozzle
- Grey cap for easy field identification
- Co-moulded wiper seal made from chemical- and chlorine-resistant materials
- Innovative seal design prevents cap-to-body leaks, even with a loose cap
- FloGuard Technology option eliminates water waste in the event of a missing nozzle

ADDITIONAL FEATURES

- Directional flush plug design for cleaner installation
- Interchangeable components for easier servicing, retrofits, and upgrades
- Heavy-duty spring for consistent riser retraction
- Check valve option eliminates low-head drainage

OPERATING SPECIFICATIONS

- Check valve available for 10 cm, 15 cm, and 30 cm models (up to 4.3 m of elevation)
- Operational pressure range: 1.0 to 7.0 bar; 100 to 700 kPa
- Warranty period: 5 years

FACTORY-INSTALLED OPTIONS

- Reclaimed water identification
- FloGuard Technology available for pop-up models

USER-INSTALLED OPTIONS

- Reclaimed water ID cap (P/N 458562SP)
- Snap-on reclaimed cover (P/N PROS-RC-CAP-SP)
- Shutoff cap (P/N 213600SP)
- Shutoff nozzle (P/N 916400SP)

PRS40 Reclaimed

PRS40 models include optional factory-installed purple reclaimed caps.

PROS-00-PRS40

MP Rotator Nozzles
Page 56

This valve is the perfect choice for high-pressure systems and dirty water conditions.

KEY BENEFITS

- Optional Filter Sentry Mechanism scours the filter screen in dirty water conditions
- External/internal manual bleed allows for quick and easy activation at the valve
- Glass-filled nylon construction provides high-pressure rating and reliability
- Double-beaded diaphragm seal design ensures leak-free performance
- Fabric-reinforced EPDM diaphragm and seat ensure greater performance in all water conditions
- Captive bonnet screws eliminate the possibility of lost parts during disassembly
- Triple-tool bonnet screws are compatible with standard or Phillips screwdrivers as well as a nut driver
- Encapsulated solenoid with captive plunger used on every Hunter valve provides hassle-free service
- Flow control maximises efficiency and prolongs the life of the system

USER-INSTALLED OPTIONS

- Accu Sync™ Pressure Regulator at the valve
- DC-Latching Solenoid for battery-operated controllers (P/N 458200)
- Filter Sentry Mechanism easily added to an installed valve

FACTORY-INSTALLED OPTIONS

- LS: Valve without solenoid
- DC: DC-Latching Solenoid for battery-operated controllers
- FS: Filter Sentry
- FS-R: Reclaimed option with Filter Sentry Mechanism, purple control knob, and purple chlorine-resistant diaphragm

OPERATING SPECIFICATIONS

- Flow:

FXLuminaire

EXPERIENCE ALL WALKS OF LIGHT

Landscape and Architectural Lighting

FX Luminaire provides industry-leading landscape and architectural lighting solutions with a focus on the advancement of LED technology and digital lighting control with zoning, dimming, and colour adjustment capabilities.

Designer and Standard Series Fixtures

FX Luminaire offers a range of classic and contemporary lighting fixtures in all configurations, from up lights and down lights to path lights and specialty lights.

Our fixture classification system is based on material construction, performance, and price. This helps you quickly identify common fixtures and create lighting packages for any project or budget. All FX Luminaire fixtures are made with top-quality materials and backed by the industry's best support team.

fxl.com

Luxor™ Controller

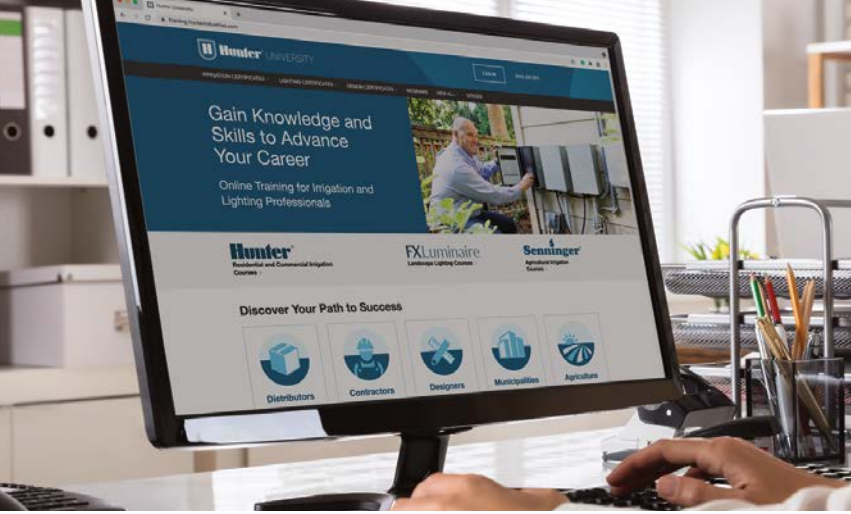

With Luxor Technology, you can liven up your clubhouse, course pathways, or property entryways to complement any occasion with 30,000 vibrant colour possibilities. Design one-of-a-kind holiday displays, create the perfect ambience for weddings, add company colours for corporate events, or simply adjust hues to match vegetation as the seasons change.

With a Luxor Controller, you can also create up to 250 adjustable lighting groups that can be turned on independently and dimmed from 1-100%.

The Luxor App provides ultimate flexibility and convenience when designing with Luxor Lighting Control Systems. With the app, you can adjust fixture intensities and colours, program up to 40 calendar-based themes, and fine-tune your colour palette — from anywhere!

A construction worker wearing a white hard hat, safety glasses, an orange high-visibility safety vest over a dark long-sleeved shirt, and blue jeans is using a shovel to dig in the ground. The worker is wearing black gloves and is focused on the task. The background shows green foliage and a tree trunk. PRECIPITATION RATES

In this section, the “Sprinkler Spacing Method – Any Arc and Any Spacing” equation is used to calculate precipitation rates. The first set of equations with the ■ shows the precipitation rate for the sprinklers when they are laid out in a square pattern. The next set with the ▲ shows the precipitation rate for the sprinklers laid out in an equilateral triangular spacing pattern. This is the “Sprinkler Spacing Method – Equilateral Triangular Spacing” equation.

WHAT IS PRECIPITATION RATE?

If someone said they were caught in a rainstorm that dropped 25 mm of water in an hour, you would have some idea of how hard or heavily the rain came down. A rainstorm that covers an area with 25 mm of water in one hour has a precipitation rate of 25 mm per hour. Similarly, the precipitation rate is the speed at which a sprinkler or an irrigation system applies water.

MATCHED PRECIPITATION RATES

A zone or system in which all the heads have similar precipitation rates is said to have “matched precipitation rates.” Systems that have matched precipitation rates reduce wet and dry spots and minimise run times, which reduces water consumption and lowers costs. Knowing that sprinkler spacing, flow rates, and arcs of coverage affect precipitation rates, a general guideline is: as the spray arc doubles, so should the flow.

 90° Arc = 1 GPM; 0.23 m³/hr; 3.8 l/min

 360° Arc = 4 GPM; 0.91 m³/hr; 15.1 l/min

 180° Arc = 2 GPM; 0.45 m³/hr; 7.6 l/min

The flow rate of half-circle heads must be two times the flow rate of the quarter-circle heads, and the full-circle heads must have two times the flow rate of the half-circle heads. In the illustration, the same amount of water is applied to each quarter circle area and precipitation is therefore matched.

CALCULATING PRECIPITATION RATES

Depending on the construction of the irrigation system, the precipitation rate may be calculated by either a Sprinkler Spacing or a Total Area method.

Sprinkler Spacing Method (■)

The precipitation rate should be calculated for each individual zone. If all sprinkler heads on the zone have the same spacing, flow rate, and arc of coverage, use one of the following formulas:

Any Arc and Any Spacing (■):

$$\begin{aligned} \text{P.R. (in/hr)} &= \frac{\text{Flow Rate (GPM) for any Arc} \times 34,650}{\text{Degrees of Arc} \times \text{Head Spacing (ft)} \times \text{Row Spacing (ft)}} \\ \text{P.R. (mm/hr)} &= \frac{\text{Flow Rate (m}^3\text{/hr) for any Arc} \times 360,000}{\text{Degrees of Arc} \times \text{Head Spacing (m)} \times \text{Row Spacing (m)}} \\ \text{P.R. (mm/hr)} &= \frac{\text{Flow Rate (l/min) for any Arc} \times 21,600}{\text{Degrees of Arc} \times \text{Head Spacing (m)} \times \text{Row Spacing (m)}} \end{aligned}$$

Sprinkler Spacing Method (▲)

The precipitation rate should be calculated for each individual zone. If all sprinkler heads on the zone have the same spacing, flow rate, and arc of coverage, use one of the following formulas:

Equilateral Triangular Spacing (▲):

$$\begin{aligned} \text{P.R. (in/hr)} &= \frac{\text{Flow Rate (GPM) for any Arc} \times 34,650}{\text{Degrees of Arc} \times (\text{Head Spacing})^2 \times 0.866} \\ \text{P.R. (mm/hr)} &= \frac{\text{Flow Rate (m}^3\text{/hr) for any Arc} \times 360,000}{\text{Degrees of Arc} \times (\text{Head Spacing})^2 \times 0.866} \\ \text{P.R. (mm/hr)} &= \frac{\text{Flow Rate (l/min) for any Arc} \times 21,600}{\text{Degrees of Arc} \times (\text{Head Spacing})^2 \times 0.866} \end{aligned}$$

Total Area Method

The precipitation rate for a “system” is the average precipitation rate of all sprinklers in an area, regardless of the spacing, flow rate, or arc for each head. The Total Area Method calculates all the flows of all of the heads in any given area.

$$\begin{aligned} \text{P.R. (in/hr)} &= \frac{\text{Flow (GPM)} \times 96.25}{\text{Total Area (ft}^2\text{)}} \\ \text{P.R. (mm/hr)} &= \frac{\text{Flow (m}^3\text{/hr)} \times 1,000}{\text{Total Area (m}^2\text{)}} \\ \text{P.R. (mm/hr)} &= \frac{\text{Flow (l/min)} \times 60}{\text{Total Area (m}^2\text{)}} \end{aligned}$$

PILOT FIELD CONTROLLER ELECTRICAL SPECIFICATIONS

ELECTRICAL SPECIFICATIONS

Supply Voltage

Auto-sensing frequency (50 or 60 Hz)
120 VAC nominal (100 to 132 VAC)¹
230 VAC nominal (200 to 260 VAC)¹
Station output: 24 VAC at 1.0 A

CAPACITIES

Station Capacity

80 stations
Up to 20 stations can run simultaneously²

Station Solenoid Load

Up to four 24 VAC Hunter golf solenoids per station output³

¹ To prevent damage, all Pilot Field Controllers are shipped with the supply voltage set to 230 VAC.

² One 24 VAC Hunter golf solenoid per station.

³ Multiple solenoids connected to a single station will reduce total simultaneous stations.

PILOT INTEGRATED HUB ELECTRICAL SPECIFICATIONS

ELECTRICAL SPECIFICATIONS

Supply Voltage

Auto-sensing frequency (50 or 60 Hz)
Auto-switching 120/230 VAC nominal (100 to 277 VAC at 50/60 Hz)¹

CAPACITIES

Integrated Two-Way Module Capacity

Up to 999 integrated Pilot™ Two-Way Modules per Pilot Integrated Hub
Up to 120 24 VAC Hunter solenoids on at one time²

Integrated Two-Way Module Solenoid Load

Up to two 24 VAC Hunter solenoids per integrated Pilot Two-Way Module³

¹ The Pilot Integrated Hub automatically detects supply voltage and frequency.

² Depends on configuration. Pilot Integrated Hub will run up to 30 stations simultaneously per output module.

³ Two solenoids per Pilot Two-Way Module does not reduce the maximum simultaneous station count.

WIRE SIZING

REQUIRED INFORMATION

- 1) Actual one-way length of wire between the controllers and the power source or the controllers and valves
- 2) Allowable voltage loss along the wire circuit
- 3) Accumulative current flowing through the wire section being sized in amperes

RESISTANCE IS CALCULATED USING THIS FORMULA:

$$R = \frac{1,000 \times AVL}{2L \times I}$$

R = Maximum allowable resistance of wire in ohms per 1,000 m

AVL = Allowable voltage loss

L = Wire length (one way)

I = Inrush current

AVL for controller power wire sizing is calculated by subtracting the minimum operating voltage required by the controller from the minimum available voltage at the power source.

AVL for valve wire sizing is calculated by subtracting minimum solenoid operating voltage from controller output voltage.

This number will vary depending on the manufacturer and in some cases with line pressure.

VALVE WIRE SIZING EXAMPLE

Given: The distance from the controller to the valve is 600 m. The controller output is 24 V. The valve has a minimum operating voltage of 20 V and an inrush current of 370 mA (0.37 A).

$$R = \frac{1,000 \times 4}{2(600) \times 0.37}$$

$$R = \frac{4,000}{444}$$

$$R = 9.01 \text{ ohms}/1,000 \text{ m}$$

So, wire resistance cannot exceed 9 ohms per 1,000 m. Now go to table 1 and select the proper wire size. Since 1.5 mm² gauge wire has more resistance than 9 ohms per 1,000 m, choose 2.5 mm² wire.

Table 2 is a quick reference and is set up to provide maximum wire runs given the information at the bottom of the table.

TABLE 1 - RESISTANCE OF COPPER WIRE		TABLE 2 - ALLOWABLE DISTANCES FOR VARIOUS WIRE SIZES*						
Wire Size (mm ²)	Resistance in Ohms per 1,000 m at 20° C	Ground Wire (mm ²)	0.5	1.0	Control Wire (mm ²)			
			1.5	2.5	4.0	6.0		
0.5	34.5	0.5	157	209	235	261	279	289
1.0	17.2	1.0	209	314	377	449	503	538
1.5	11.5	1.5	235	377	470	588	684	754
2.5	6.9	2.5	261	449	588	783	965	1103
4.0	4.3	4.0	279	503	684	965	1,257	1,502
6.0	2.9	6.0	289	538	751	1,103	1,502	1,864

Notes:

Maximum one-way distance in metres between controller and solenoid assuming 370 mA inrush current, AVL = 4 volts, 1 valve on at a time.

Table 2 is for a single active solenoid. With two solenoids operating simultaneously on the same wires, the wire distances should be halved.

STATEMENT OF WARRANTY

Hunter Residential and Commercial Irrigation Products

Hunter Industries Incorporated (“Hunter”) warrants the following products to be free of defects in materials or workmanship under normal use in landscape irrigation applications for the specified period of time outlined below from the original date of manufacture:

ONE YEAR	ROTORS	SRM	MICRO	Micro Sprays, PLD Fittings, Rigid Risers, Air Relief Valves, RZB
	TWO YEARS	ROTORS	PGP-ADJ, PGJ, HCV	CONTROLLERS
	SPRAYS	PS Ultra Family, SJ, FlexSG, HSBE Family	SENSORS	HC Flow Meter (wired and wireless)
	NOZZLES	Spray Nozzles, PCN, PCB, AFB, MSBN	MICRO	ACZ, PCZ, RZWS, Point-Source Emitters, Tubing, Multi-Port Emitters, IH Risers, MLD, Eco-Indicator, Multi-Purpose Box, Senninger Regulators, PLD-LOC Fittings
	VALVES	PGV Family	TOOLS	SpotShot
	CENTRAL	A2C-WIFI, A2C-LAN, A2C-CELL-E, WIFIKIT, LANKIT, CELLKIT		
THREE YEARS	CONTROLLERS	ROAM XL, EZ Decoder System, EZ-DT	MP ROTATOR	All
FIVE YEARS	ROTORS	PGP Ultra, I-20, I-25, I-40, I-50, I-80, and I-90 Families	CONTROLLERS	ACC2, ICC2, ICD Decoders, ICD-HP
	SPRAYS	Pro-Spray, Pro-Spray PRS30, and Pro-Spray PRS40 Families	SENSORS	Clik Sensors, Flow-Sync, MWS, Solar Sync, Wireless Flow Sensor
	VALVES	HQ, ICV, IBV	MICRO	ICZ, PLD, HDL, HDL-COP**, Eco-Mat, Eco-Wrap

Hunter Golf and ST System Irrigation Products*

Hunter will unconditionally repair, replace, or repurchase, at its sole discretion, any defective component* assemblies contained within the Golf and ST products listed below by category, returned freight prepaid, from the date of manufacture within a period of:

ONE YEAR	GOLF CONTROLLERS	Pilot Command Center Software, Pilot-FC, Pilot-FI, Pilot Hub
THREE YEARS	GOLF ROTORS	TTS-800 Series, G-800 Series, G-900 Series, B Series
	GOLF TWO-WAY MODULES	Pilot 100, Pilot 200, Pilot 400, Pilot 600
FIVE YEARS	GOLF ROTORS	The golf rotor component warranty is extended to 5 years with a one-for-one purchase of an HSJ Swing Joint from an authorised Hunter Golf distributor.
	SWING JOINTS	HSJ-0, HSJ-1, HSJ-2, HSJ-3
	ST ROTORS	ST-90, STG-900, ST-1200, ST-1600, ST-1700
	ST ACCESSORIES	All models starting with “ST”
	COMPUTER, PRINTERS & ACCESSORIES, MAINTENANCE RADIO & BATTERY	Equipment manufacturer’s warranty (no Hunter warranty)

* Warranty covers repair, replacement, or repurchase of individual defective component assemblies contained within the product. Returns of complete finished goods are not allowed under warranty without prior approval from the Hunter Product Manager.

If used for agricultural applications, Hunter limits the warranty for valves, sprays, MP Rotator Nozzles, and rotor products to a period of one (1) year from the original date of manufacture. This agriculture limitation supersedes all other warranties expressed or implied.

** Plus 2 additional years for environmental stress cracking. No warranty against root intrusion on HDL-COP. While the use of copper does not completely remove the chance of root intrusion, it has been shown to assist in its prevention when coupled with proper irrigation scheduling.

*** Eco-Indicator – 15 cm ECO-ID: 2-year warranty; 30 cm ECO-ID-12: 5-year warranty

**** Hunter’s cellular module warranty does not apply to the availability or compatibility of cellular data service, in any particular area. Availability of compatible data services should be determined prior to installation.

Statement of Warranty, Continued

If a defect in a Hunter product is discovered during the applicable warranty period, Hunter will repair or replace, at its option, the product or the defective part. This warranty does not extend to repairs, adjustments, or replacement of a Hunter product or part that results from misuse, negligence, alteration, modification, tampering, or improper installation and/or maintenance of the product. This warranty extends only to the original installer of the Hunter product. If a defect arises in a Hunter product during the warranty period, contact your local Hunter Authorized Distributor.

Hunter’s warranty applies only to products installed as specified and used as intended for irrigation purposes. Hunter’s warranty shall be limited to defects in materials and workmanship during the warranty period, and shall not extend to situations in which the product was subjected to improper design, installation, operation, maintenance, application, abuse, improper electrical current, grounding, service other than by Hunter authorized agents, operating conditions other than that for which it was designed, or in systems using water containing corrosive chemicals, electrolytes, sand, dirt, silt, rust, or agents that otherwise attack and degrade plastics. Hunter’s warranty does not cover component failures caused by lightning strikes, electrical power surges, or unconditioned power supplies. If products are repurchased, the price to Distributor for such products in effect at the time of return will apply.

Hunter’s obligation to repair, replace, or repurchase its products or product components as set forth above is the sole and exclusive warranty extended by Hunter. There are no other warranties, expressed or implied, including warranties of merchantability and warranties of fitness for a particular purpose. Hunter will not be liable to a distributor or to any other party in strict liability, tort, contract, or any other manner for any damages caused or claimed to be caused as a result of any design of or defect in Hunter’s products, or for any special, incidental, or consequential damages of any nature.

Where applicable, Hunter’s statement of warranty complies with local directives.

If you have any questions concerning the warranty or its application, please email support@hunterindustries.com.

ASAE CERTIFICATION STATEMENT

Hunter Industries Incorporated certifies that pressure, flow rate, and radius data for these products were determined and listed in accordance with ASAE Standard S398.1, Procedure for Sprinkler Testing and Performance Reporting, and are representative of performance of production sprinklers at the time of publication. Actual product performance may differ from the published specifications due to normal manufacturing variations and sample selection. All other specifications are solely the recommendation of Hunter Industries Incorporated.

Helping our customers succeed is what drives us. While our passion for innovation and engineering is built into everything we do, it is our commitment to exceptional support that we hope will keep you in the Hunter family of customers for years to come.

Gregory R. Hunter, CEO of Hunter Industries
